

## Get on Track with STEM!

Kids in our preschool and after school programs are learning about STEM (Science, Technology, Engineering and Math). From Math Bowling with our preschoolers, to building atoms from marshmallows and hot air balloon launching pads for our older kids, we're gearing up for big ideas! Thanks to recent grant awards from PNC, Alcoa, and PSE&G Foundations, we are broadening our curriculum; Get on Track with STEM, to inspire hands-on, inquiry-based learning to help our kids think like a scientist.
